FOR CONCRETE CONSTRUCTION

Variety Packs shown

## SHIMS FOR TILT-UP CONCRETE

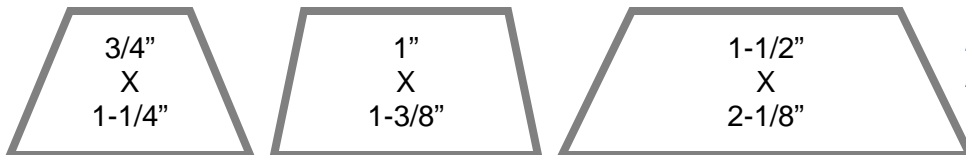

Shims are manufactured from High Impact Polystyrene and will not rust or stain the concrete. They are available in single sizes or in variety packs.

Shims thicknesses are 1/4", 1/8" and 1/16" and available in 4" X 4" or 4" X 6" sizes.

Variety Packs include (3) 1/4", (2) 1/8" and (1) 1/16" for a total pack thickness of 1-1/16". Packs are also available in 4" X 4" or 4" X 6" sizes.

## REVEAL STRIPS

Reveals are used to create architectural details in concrete. Southern offers a variety of materials for particular applications and the number of reuses desired. Our standard Reveal Strips are manufactured from ABS, a rigid and durable plastic for non-radius applications and moderate reuse requirements.

### ABS REVEAL STRIPS

All three sizes are 3/4" in height

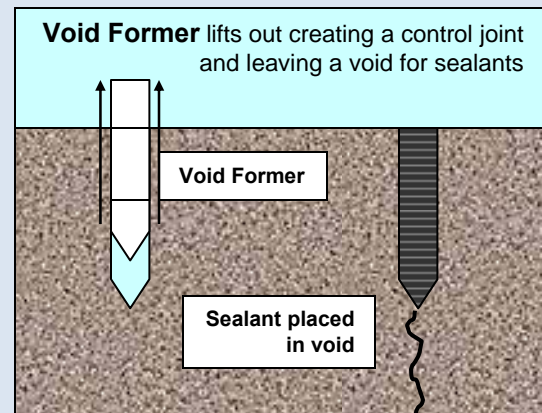

**CUSTOM REVEAL STRIPS** are available in solid High Density Polyethylene (HDPE) or elastomeric materials. HDPE Reveal Strips are for non-radius, high reuse applications. Elastomeric Reveal Strips are suitable for radius applications and offer a high reuse factor. Please call for additional information on Custom Reveal Strips.

## VOID FORMER

Eliminate the need for saw cutting and form accurate voids for sealants with Southern Metal's Void Former. Lightweight and easy to install, this material can be used again and again.

Available in the following sizes:

Depth	X	Width
2"		1/4"
2-1/4"		3/8"
3"		3/8"

## 3-1/2" PLASTIC KEYWAY

Keyway is manufactured from lightweight, impact resistant plastic and is reusable. Southern's Keyway nails or staples easily to the form to create a keyed joint.
